It's not for every person, but if you want to learn about computers, or you just want to play around with stuff, I'd recommend Windows 7. It's a really fun OS. Henry Burboch, Windows consultant at I.P. Repair. Windows 7 is Microsoft's latest version of the Windows OS. The company claims that the new OS is faster and much more stable than Vista. That sounds good to me, because as a long time Windows user, I can't stand the new OS (which I'll go into below). Windows 7 has its fans, but it's mostly developers and techies that like it, and those people can't do without Windows. If you are looking for a simple and easy to use OS, Windows XP will suit you better. Windows 7 is one of those controversial operating systems. Some say it's a copy of Vista, and that's half-true. The Windows 7 interface looks similar to Vista's, but there are a lot of new features. Windows 7 is a very user-friendly OS with a new user interface. Vista was awful to use. Microsoft did a complete overhaul of the interface to improve the usability of the OS. As with other Windows users, I just don't understand the fascination with this new OS. Windows 7 has a very slick and modern interface. I didn't like the way that Vista looked at first, but once I got used to it, I found it easier to use. I still prefer XP's interface, though, because it's cleaner and more useful. Most of the new features work very well, and there are some changes that I'm quite fond of. All in all, Windows 7 is a fine OS, but as a user, I would have preferred to have seen a fresh reworking of Windows XP. I hope that Microsoft will do this some day. Windows 7 or Vista: Which OS is better?. Windows Vista was released in early 2007, and it received a lot of critical acclaim as the best Windows release since Windows XP. Windows Vista is now generally regarded as a flop, and this has caused some of the support and IT teams to rethink Windows Vista as an operating system. Top 10 Reasons why you should NOT use Windows Vista!. Top 10 Reasons why you should NOT use Windows Vista!. Windows Vista is now generally regarded as a flop, and this has caused some of the support and IT teams to rethink Windows Vista as an operating system. Top 10 Reasons why you should NOT use Windows Vista!. Top 10 Reasons why you should NOT use Windows Vista!
