

[All-in-one Wp Migration Nulled 42](#)

The screenshot shows the WordPress dashboard sidebar on the left with the following menu items: Posts, Portfolio, Media, YouTube Free, Pages, Comments, Contact, Genesis, Appearance, Plugins (6), Users, Tools, All-in-One WP Migration, Export, Import, and Backups. A red arrow points to the 'All-in-One WP Migration' item. The main content area displays the 'EXPORT SITE' configuration for the plugin. At the top right of this section is a 'REPORT ISSUE' button. Below it is a blue notification box stating: 'Since version 1.8.0, Site URL is deprecated. Upon import, the plugin auto-detects Site URL and makes necessary changes to the database.' Below the notification is a search and replace field with the text 'Find <text> Replace with <another-text> in the database' and a right-pointing arrow. Underneath is an '+ ADD' button. Further down is an expandable section for 'Advanced options (click to expand)' which contains an 'EXPORT TO' button with a hamburger menu icon.
